

WHO WE ARE

We are the Centre of Science and Technology of Antioquia, a corporation entrusted to promote science, technology, and innovation as instruments to transform people, companies, and territories.

We are an innovation and productivity centre endorsed by the Ministry of Science, Technology, and Innovation of Colombia (MINCIENCIAS).

For over 30 years we've been recognized as an institution that articulates and dynamize the triad State - University - Business, driving transformation and development in the territories through knowledge.

WHAT WE DO

We promote and enable Social Appropriation of Knowledge in science, technology and innovation through the design and implementation of programs, instruments, methodologies, as well as studies and researches that facilitates the building of agendas, plans and public policies, and the development of networks and institutions, contributing with the sustainability of territories, value generation in companies and strengthening of people's competencies.
